

CREATE IBM WATSON IOT PLATFORM AND DEVICE

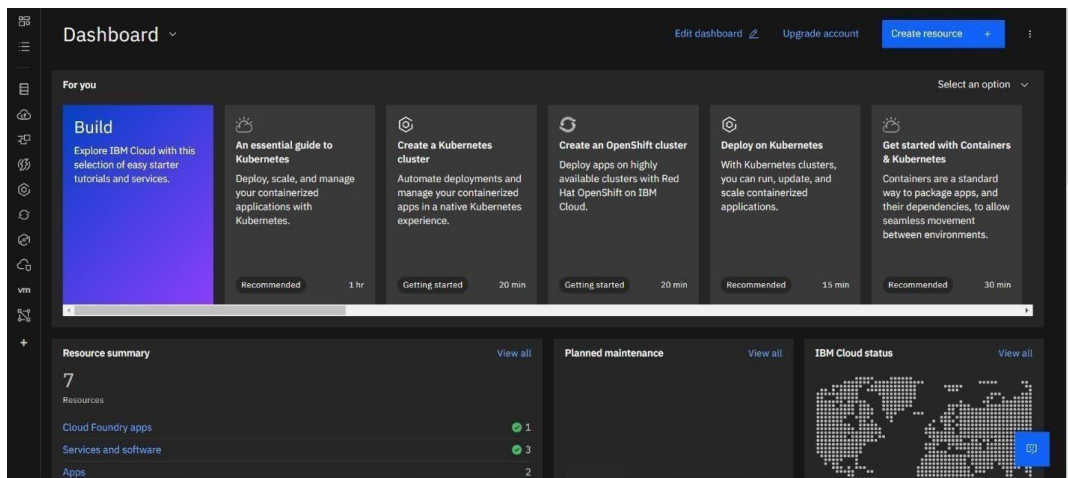

TEAM ID	PNT2022TMID30091
PROJECT NAME	IOT Based Smart Crop Protection System for Agriculture

IBM Watson IOT platform and device development STEPS:

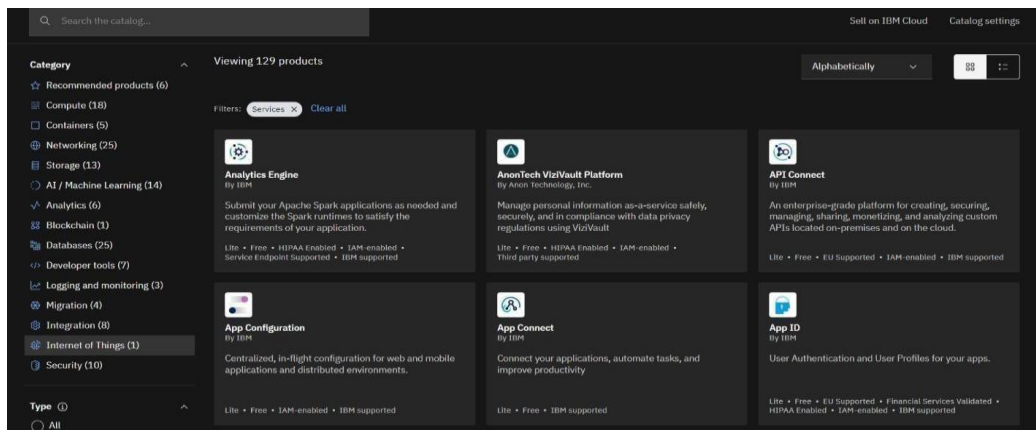

1. The unique IBM id and password are used to create an IBM cloud account.

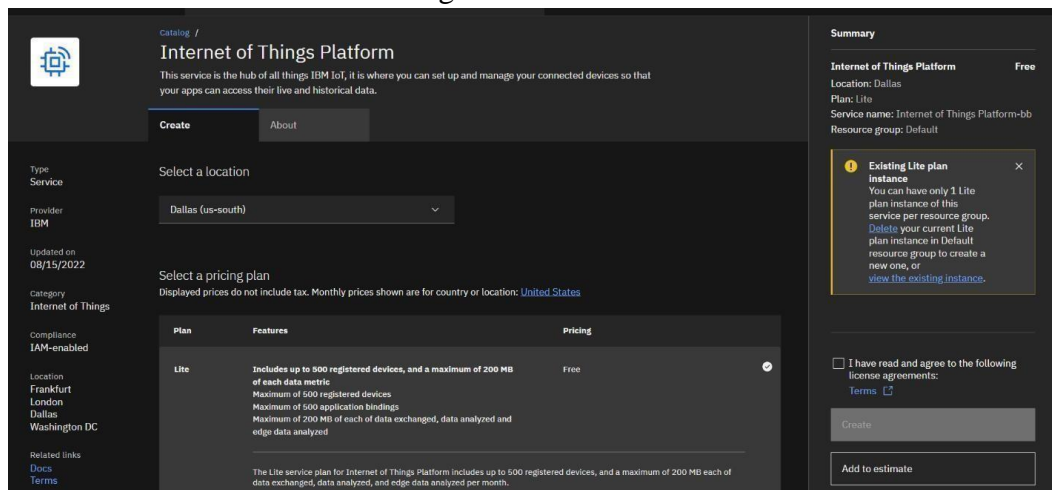

2. Web site for IBM Cloud

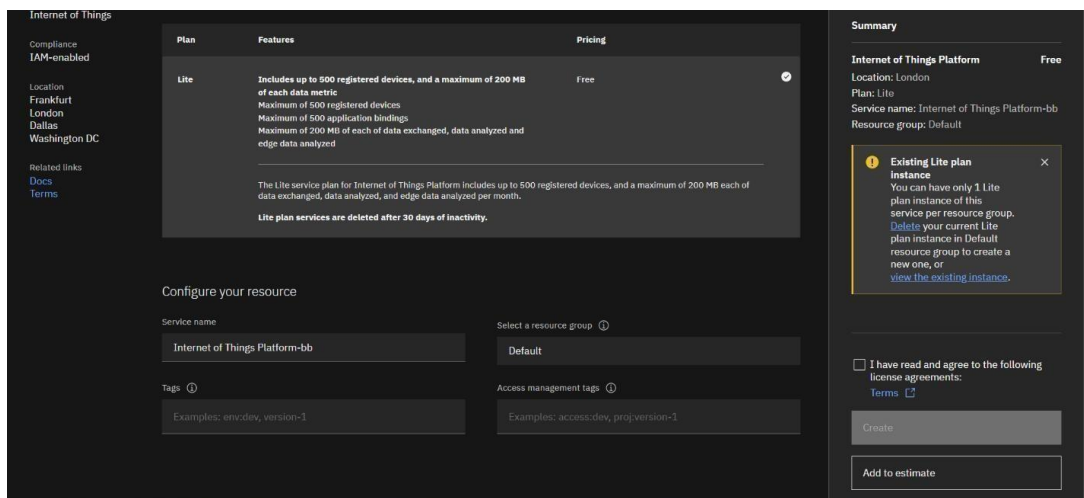

3. Select the catalogue link at the top.

4. Select IoT from the list of categories.

5. If a lite already exists, remove it; otherwise, you cannot create another.

6. Type the service name into the box under "Configure Your Resource," select the plan, check the box next to "Agree with Agreements," and then click "Create."

Internet of Things Platform
This service is the hub of all things IBM IoT, it is where you can set up and manage your connected devices so that your apps can access their live and historical data.

Displayed prices do not include tax. Monthly prices shown are for country or location: [United States](#)

Plan	Features	Pricing
Lite	Includes up to 500 registered devices, and a maximum of 200 MB of each data metric Maximum of 500 registered devices Maximum of 500 application bindings Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed	Free

The Lite service plan for Internet of Things Platform includes up to 500 registered devices, and a maximum of 200 MB each of data exchanged, data analyzed, and edge data analyzed per month.

Summary
Internet of Things Platform **Free**
Location: Dallas
Plan: Lite
Service name: Internet of Things Platform-2w
Resource group: Default

Existing Lite plan instance
You can have only 1 Lite plan instance of this service per resource group. Delete your current Lite plan instance in Default resource group to create a new one, or [view the existing instance.](#)

IBM Watson IoT Platform Journey

☒ **Lite**
The Lite service plan provides a lightweight development environment to get you started with the connectivity capabilities of Watson IoT Platform.
• Free

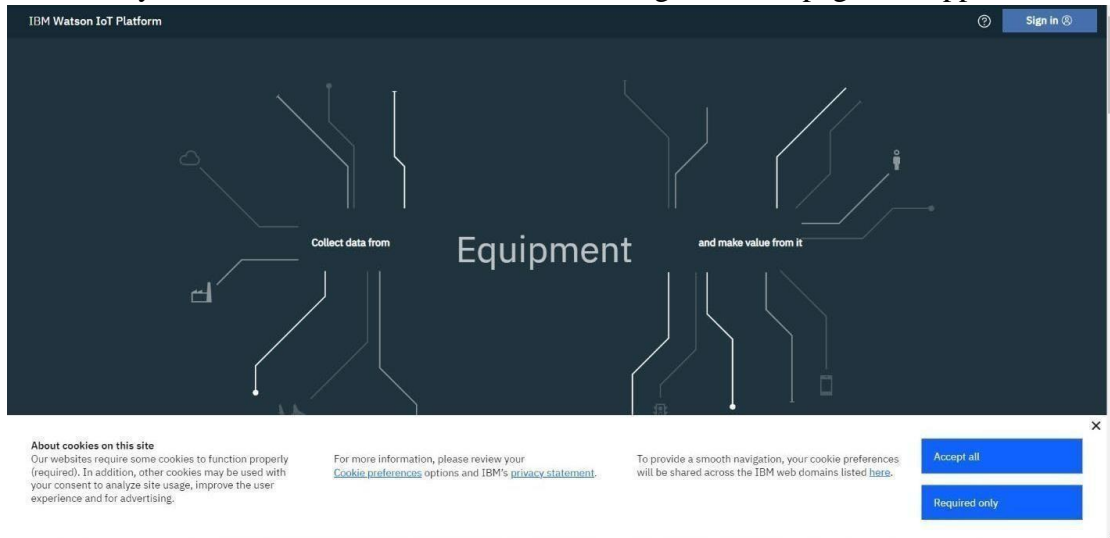

☐ **Non-Production**
The Non-Production service plan is a full-featured, fully-integrated offering that enables you to explore Watson IoT Platform to see how the service can fit into your IoT environment.
• Starts at \$500 per month

☐ **Production**
The Production service is a fully managed SaaS offering that enables you to manage and analyze enterprise IoT data.
• Includes IBM Service & Support

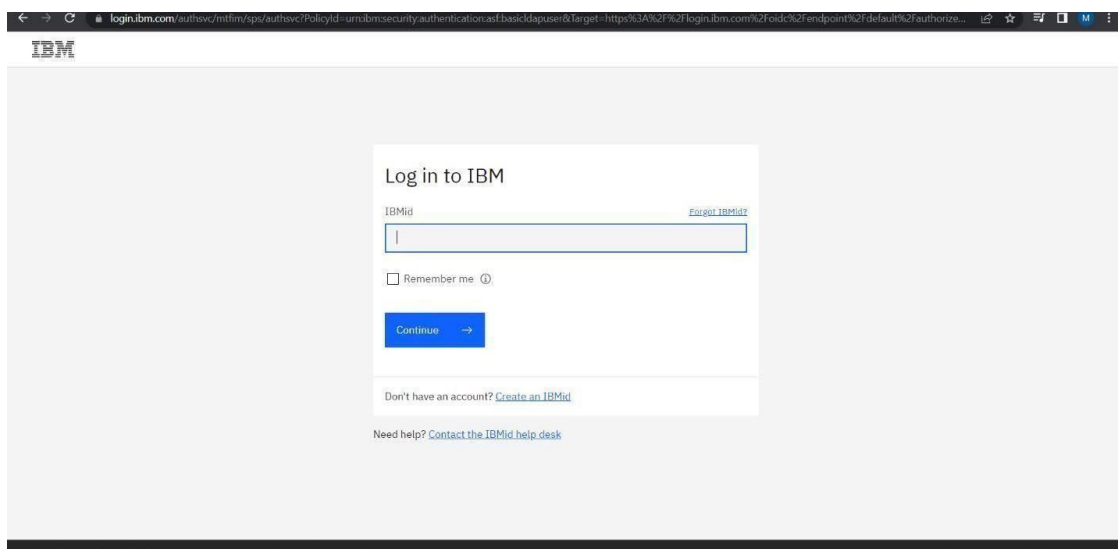

9. The connection is used to link IOT with other services, while manage is for launch and plan informs us about the payment package and its upgrades.

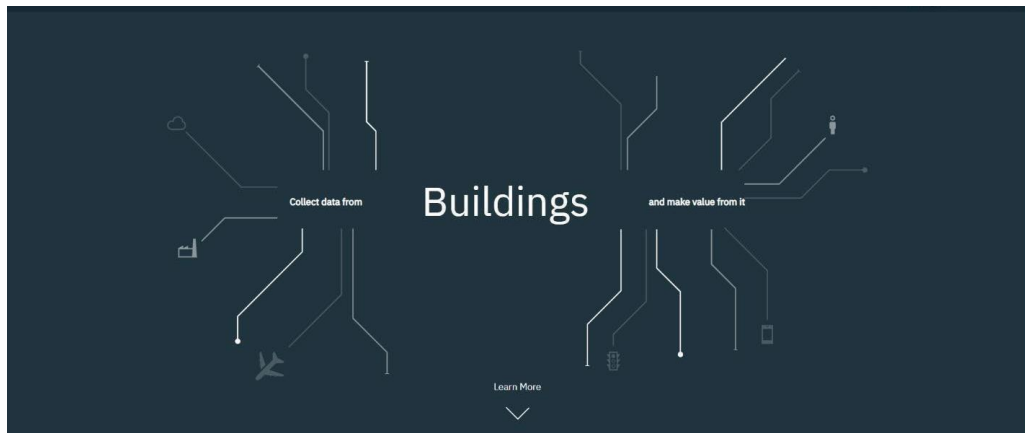

10. When you click the launch button on the Manage tab, this page will appear.

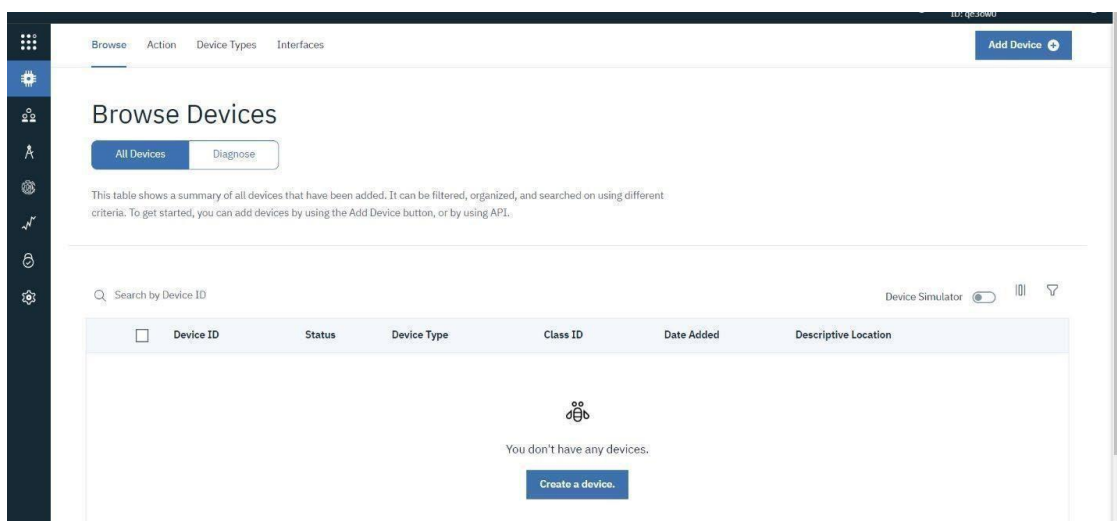

11. Fill in the information to create a device by logging into the Watson Cloud.

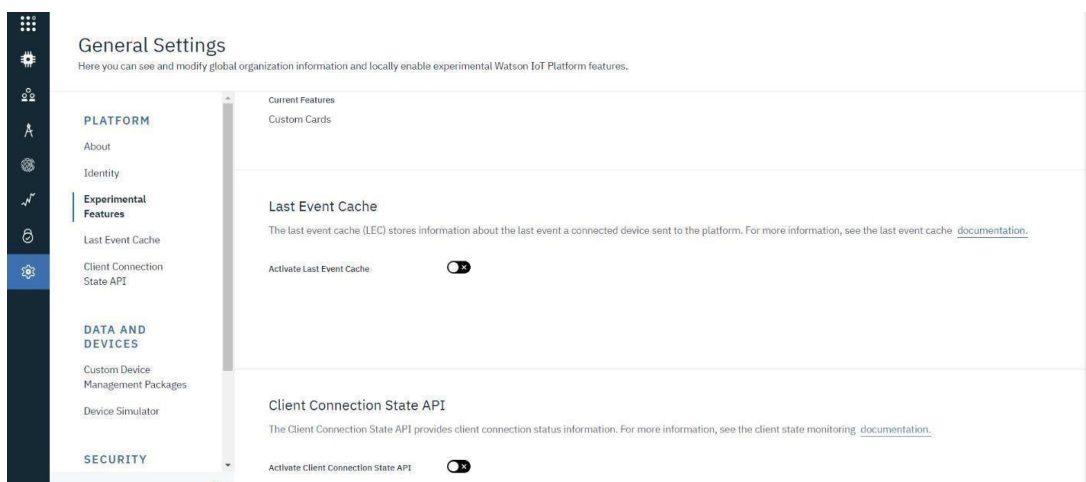

12. After logging in, the name is displayed and the page returns to the home page.

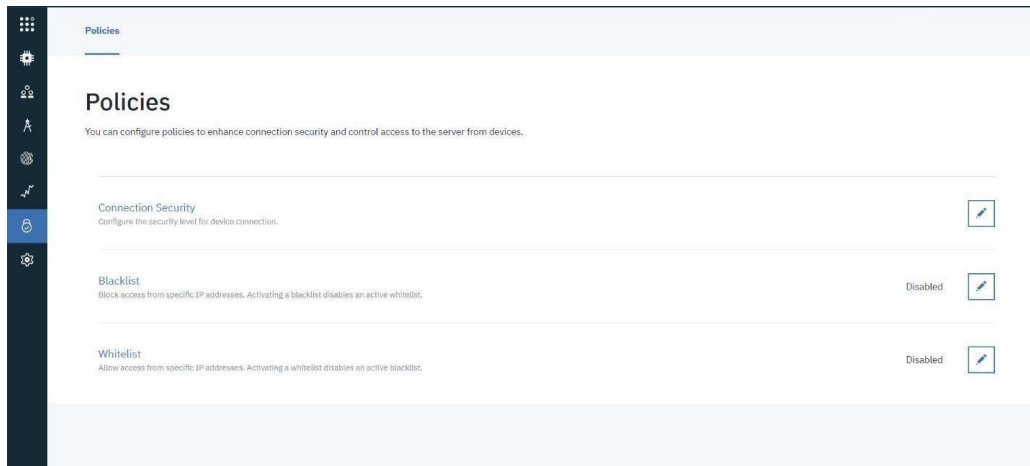

13. Clicking the launch button once more will open this tab, which contains a tool for creating and adding devices as well as for displaying information about them.

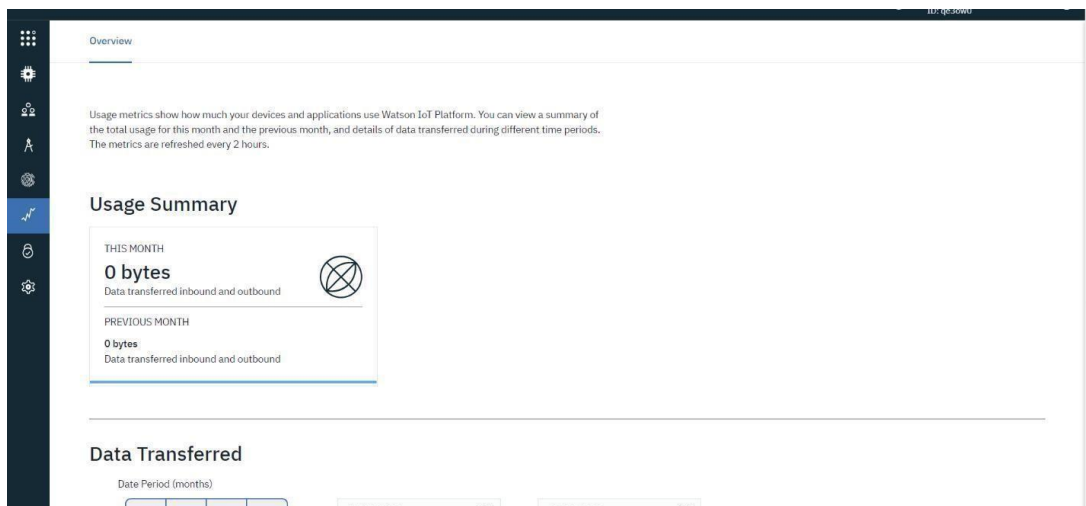

14. If necessary for the project, the general setting can be changed using the setting tab.

15. We can change the type of security connection and the specification in the security tab.

16. Usage summarises the amount of data transferred between the devices and the IBM cloud.

17. The team members are added to the platform through the member tab.

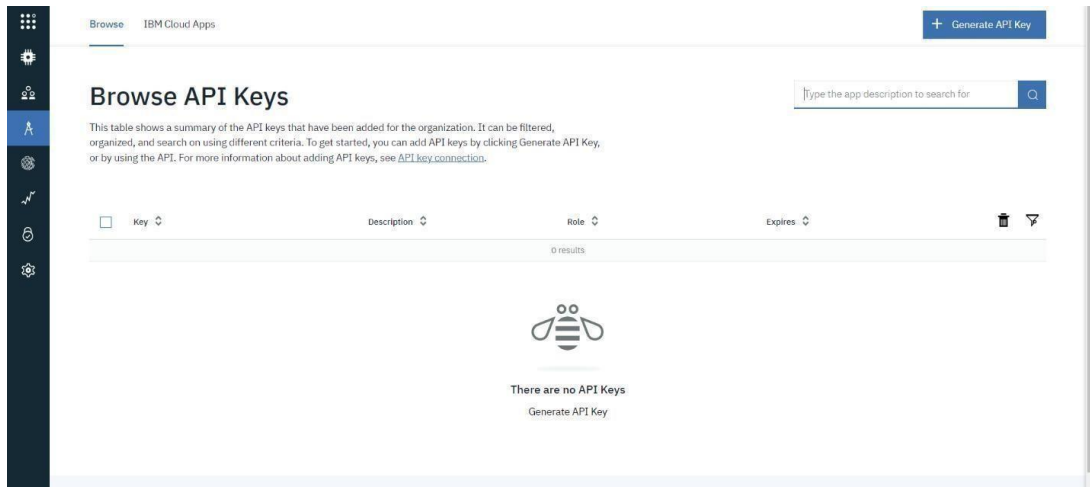

Browse Members

Type the member email to search for

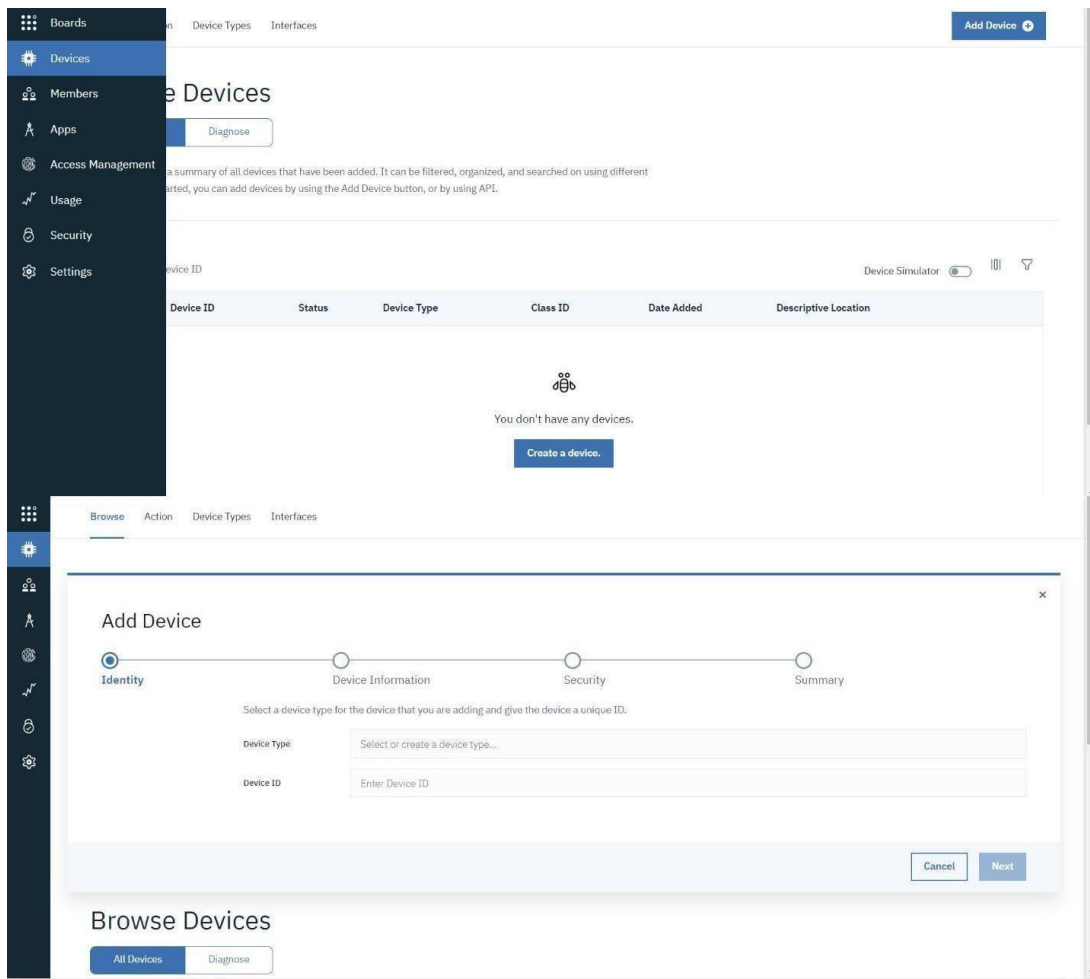

This table shows a summary of the members of the organization. It can be filtered, organized, and search on using different criteria. To get started, you can add members by clicking Add Members, or by using the API. For more information about members, see [Managing user access](#).

Email Address	Name	Role	Added By	Expires	
1 result					
worldisfullofmeow@gmail.com	worldisfullofmeow@gmail.com	Administrator	-	-	⋮

18. When you want to connect to another platform and integrate with other services, you use this tab.

19. Select the device tab, select Add Device, enter the device type and device id, and select Next.

20. This page to add additional information and of the hardware

21. After clicking next, the security screen appears, where we perform authentication token id.

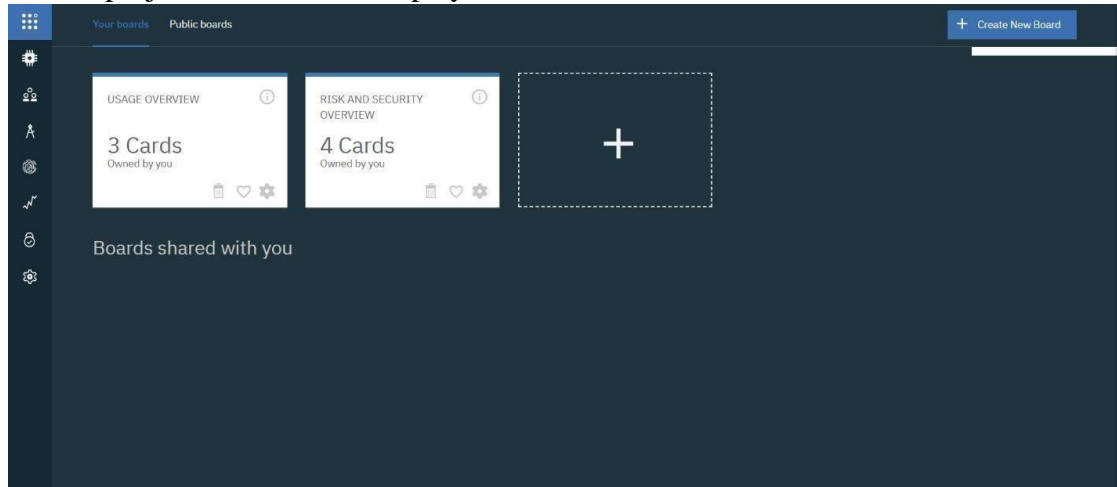

22. After selecting Next, the device's summary is displayed. Finally, select Finish.

23. A detailed display of the device credentials will appear.

24. Protect the device information because authentication tokens are non-recoverable and must be created anew if lost..

25. We can now see the newly inserted device by clicking the device tab. The further information will be shown when you click on it. There are several tabs on it, including Identity, Device Information, State, and Login. According to the specifications of our project, we can similarly create n number of devices with a 50 per page limit.

26. The project cards will be displayed on the boards.

CONCLUSION:

A device and an IBM Watson cloud are developed.
